

 **Stroke Care - How do we measure up?**

Stroke strikes 785,000 lives every year. Once a stroke has occurred, all attempts should be made to decrease the time from symptom onset to stroke treatment. Wentworth-Douglass Hospital follows guidelines and protocols put forth by the American Heart Association & The Joint Commission to ensure best practices when it comes to caring for patients. See the chart for more information.

STROKE CORE MEASURES	NUMBER OF PATIENTS	WDH Score Q3 2017	State Rate	National Rate
STK-1 MEASURES TO PREVENT BLOOD CLOTS	14/14	100%	96%	97.7%
STK-2 DISCHARGED ON MEDICATION TO REDUCE STROKE RISK	17/17	100%	100%	99.4%
STK-3 BLOOD THINNER THERAPY FOR A-FIB/ FLUTTER	7/8	87.5%	93.3%	97.1%
STK-4 BLOOD CLOT BUSTING DRUG ON PATIENT ARRIVAL	1/1	100%	100%	92.4%
STK-5 MEDICATION TO REDUCE STROKE RISK BY END OF HOSPITAL DAY 2	17/17	100%	98.1%	97.8%
STK-6 DISCHARGED ON STATIN MEDICATION	14/14	100%	98.1%	98.2%
STK-8 STROKE EDUCATION	8/8	100%	100%	96.4%
STK-10 ASSESSED FOR REHABILITATION	17/17	100%	98.2%	99.2%
