- For Cesarean Section patients, do not activate below orders. Refer to Physician order #: 6080–309MR

PRE–OP ORDERS: *All "pre–checked" orders will be enacted unless a specific order is written to the contrary:

- Vitagel Protocol
- For Moderate Sedation, start IV of LR 1000ml KVO
- Chlorhexidine Gluconate 2% skin prep protocol

- Transversus Abdominis Plane Block (TAP Block)
- Ketorolac (Toradol) 30 mg IV on–call to OR. Hold if allergic to aspirin or NSAIDS. Reduce dose to 15mg IV in patients 65 years or older, or weight less than 50kg, or CrCl less than 30ml/minute.

Medications: Check to activate. Give all pre–op antibiotics within 1 hour of incision

- For patients with Beta–lactam allergy:
  - Clindamycin 900mg IV PLUS Gentamicin 5 mg/kg IV (based on "Dosing Weight" if obese)
  - Metronidazole 500 mg IV PLUS Ciprofloxacin 400 mg IV

- Lorazepam (Ativan) 1 mg PO PRN X 1 for anxiety after Anesthesia evaluation
- Phenytoin (Pyridium) 100mg PO with sip of water, 30 minutes prior to surgery
- Aprepitant (Emend) 40 mg PO with sip of water, 30 minutes prior to surgery
- Acetaminophen (Tylenol) 1000 mg PO with sip of water, 30 minutes prior to surgery
- Heparin 5000 units subcutaneously on call to OR
